Introducing the New Dermapen

Advanced skin needling innovations

The latest skin therapy system.

Derma Pen is a revolutionary technology that takes the very best of skin needling, and eliminates the level of pain and lengthy recovery time that you would expect!

Dermapen uses multiple needles that vertically pierce the skin. This enhances rejuvenation results and is far safer than other methods because there is much less epidermal damage. The automatic vibrating function of the Dermapen increases absorption of products, while reducing pain and discomfort.

Dermapen is just as effective as ablative treatments such as Frazel, IPL, Laser Resurfacing and Chemical Peels. The most amazing benefit is that Dermapen's pricing is a fraction of leading alternatives.

Conditions that are ideal for treatment using the Dermapen are:

- Acne scarring
- Rosacea
- Hyper-pigmentation
- Sun damage and age spots
- Stretch Marks
- Wound scars
- Collagen restoration
